

# US DOD PROCUREMENT

## Export to US

### Contracting considerations

- Federal Acquisition Regulation (FAR)
  - for Federal purchases
- Defence Federal Acquisition Regulation Supplement (DFARS)
  - DoD contracts (in addition to FAR if working with defence agency)

### US export control laws

- International Traffic in Arms Regulations (ITAR)
  - all defence relation materials and items
- Export Administrations Regulations (EAR)
  - everything else i.e. commercial, dual-use, IT

### What else might I need?

- Products subject to UK Export Controls will need an End User Undertaking (EUU) with the application
- US DoD contracts for goods, software or technology (subject to ITAR) require a Technical Assistance Agreement (TAA)

## Import from US

Items subject to UK Export Controls, which are returned for repair, need an Export Licence before they can be re-exported to the US DoD.

## Types of Licence

### Standard Individual Export Licence (SIEL)

- most common
- for set quantity/value of goods
- goods addressed to stated person/company
- 2 year validity

### Open General Export Licence (OGEL)

- used for dual-use and military equipment
- multiple use without reapproval
- subject to annual reporting & auditing

### Open General Import Licence (OGIL)

- for import of goods to UK, subject to exceptions (firearms, anti-personnel mines, certain nuclear/chemical goods)
