

Agri-tech

Emily Pumfrey, a partner in our Agriculture and Estates team, assists rural businesses in navigating the changing landscape of the 21st century agricultural revolution.

The industry is facing unprecedented changes, not only on a legal or political level, but in terms of how farming is done and what it means to the public. With these changes, comes the opportunity for innovation and to embrace change. From green strategies and agri-environment schemes, through to agri-tech and the integration of modern technology into traditional farming and food production.

Emily acts for farming businesses, national food producers, through to machinery dealers and specialist plant breeders, and has particular expertise in assisting landowners with renewable energy projects.

How we can help:

- Introducing you to HCR legal experts with industry knowledge to help support your own innovative and cutting edge agri-tech concepts
- On farm – regulatory, health and safety and property aspects of implementing new technology and grant initiatives
- Renewable energy – an industry leading agricultural team assist landowners with renewable energy projects on every scale
- Secured Lending – helping you secure finance on your land to fund new projects and ideas
- Supporting you through the changes ahead – a full service rural team to help with business structures, succession planning, future proofing and contractual relationships.
