

HCR Protect

Introducing HCR Protect, the regulatory compliance health check from the HCR Insurance, Risk and Regulatory team.

HCR Protect reviews an organisation's existing compliance framework, including risk assessments, policies and procedures documents, and provides a diagnostic report showing where areas of risk lie.

The analysis includes reviewing relevant regulatory, legislative and best practice frameworks to cover all applicable areas of risk for your business.

Your bespoke report will clearly illustrate each area and the potential risk, providing a clean bill of health or suggesting remediation steps where necessary.

Our experience in this area allows us to provide HCR Protect reports and detailed analyses of your business risk in the following areas:

Our insurance, risk and regulatory team are here to help businesses with all aspects of compliance. With one of the largest teams of specialist regulatory lawyers, we advise companies, directors and individuals who may be facing regulatory challenges.

We work closely with regulatory bodies and keep up to date with both sector specific guidance and all upcoming legislative developments.

Our proactive approach means our clients keep ahead of any changes which may affect them and by using HCR Protect, any potential risks are quickly identified and mitigated.
